Dear Friends,

Our nation is moving toward national solutions needed to address our climate crisis. We must leverage this momentum and turn it into even greater action and progress for our common home, this time on a global stage. **Join us in sending as U.S. Catholic message to our U.S. and global leaders!**

We are asking the Biden Administration to exercise leadership at the upcoming UNFCCC Conference of Parties (COP27) gathering in Egypt with moral courage and exceptional ambition, as Catholics guided by the call to care for our vulnerable neighbors and our common home.

Add your name to this U.S. Catholic letter to the Biden Administration urging them to encourage all nations to dramatically reduce global greenhouse gas emissions and provide meaningful assistance to the nations and peoples most impacted by climate change.

[Click here to read and sign the letter](#) today! We will collect signatures through October 24th, which is United Nations Day, and deliver the letter ahead of the COP27 gathering which begins on Nov. 6th in Egypt.

As Catholics, we are called to uphold the life and dignity of every human person and to care for our common home. Please join us and our dedicated co-sponsoring partners, by signing our letter to the Biden Administration.

If you have questions, please contact us at info@catholicclimatecovenant.org

Sincerely,
